

End of Day (EOD) Report

Date: 17 July 2026

Accomplishments

- Fix the IP assignment issue in bridged network and set it to static so the server doesn't keep changing its address.
- Fixed the SSL certificate errors so Thunderbird finally recognizes the server.
- Configured team members email address in thunderbird to connect to the server.

Challenges

- I faced challenges getting the IP on bridged network eventually it was fixed by restoring everything to default and system restart.
- Had some issues with the mail server rejecting connections.

Next Steps

- Add the rest of the team as users and making sure they can connect and the issue is resolved.
- Use the dns server to map our domain to the ip.

Status

In Progress – Base setup is complete; fix the connectivity issues and test on systems.

Regards,

Mohsin Rasul
