

End of Day (EOD) Report

Date: 22 July 2026

Accomplishments

- Did research on Canonical Landscape and Ansible for managing the organization migration to Linux.
- Determined that Ansible is a cost-effective open source solution for system automation and remote configuration over SSH.
- Researched methods to prevent phishing and searched about browser policies to prevent it by comparing it with know links in database.
- Received a task to work on DevStack and use its services.

Challenges

- Both Landscape and Ansible doesn't completely solve the problem.

Next Steps

- To work on the assigned task DevStack.

Regards,

Mohsin Rasul
