

End of Day (EOD) Report

Date: 7 July 2026

Accomplishments

- I created my Medium Account.
- I installed an apache2 web server and started on localhost.
- I installed Docker and successfully ran a test container.
- Practiced basic linux commands like changing file permissions etc in Kali Linux.
- Set my Git on kali and pushed a test file to a new GitHub repo.
- Created a custom html web server and did nmap scanning and saved all the screenshots and create a task report and saved on github.

[Report](#)

Challenges

- I just had to lookup some commands.
- I faced some challenge while using git to push file to github server had to generate a token to connect to the repo and then push.

Next Steps

- Use nmap on the custom login page I made and learn the topics deeply.

Regards,

Mohsin Rasul
