

End of Day (EOD) Report

Date: 15 July 2026

Accomplishments

- I had already setup Kali Linux, Ubuntu and pfSense VM in VMware Workstation Pro.
- Successfully build and executed python port scanner using docker. [Task](#)
- Downloaded and installed the Ubuntu-Server for the email server.

Challenges

- While installing the server had some challenge with the disk partitioning.

Next Steps

- Install and configure Postfix and Dovecot on the new Ubuntu server.
- Connect and test the email server.

Status

In Progress – VM and containerization tasks completed; email server configuration is in progress.

Regards,

Mohsin Rasul
